It is deeply satisfying to be able to go out into the garden and harvest fruit, vegetables, herbs and much more besides for use in your daily cooking. This satisfaction is even deeper when you own a greenhouse, because your greenhouse enables you to grow fruit and vegetables that are otherwise not grown in our part of the world.

Halls is an old British company that has existed since 1936, and it was the first in the world to mass-produce greenhouses. Halls is closely associated with English gardening traditions and provides quality greenhouses at reasonable prices to this very day. The company offers a wide range of products and provides every opportunity to make your dream come true, regardless of whether you are a novice or an experienced gardener.

Universal

The Universal range has two roof vents for increased ventilation, integral guttering and easy clip in glazing system.

With its box section ridge, and cast joints at both ridge and eaves, this sturdy range is ideal for the real enthusiast, providing you with a sound investment for your long term gardening needs.
Magnum

The Magnum range is perfect for the keen gardener requiring a large growing area, with the largest model affording 11.5 m².

There is also extra height and increased accessibility, with additional height at the eaves, and double doors as standard.

They incorporate integral guttering and easy clip-in glazing, cast joints at both ridge and eaves, together with a box-section ridge, while ventilation is via four roof vents.

Europa 48

The Europa lean-to provides a traditional style with which you can make the most of even limited space.

Attaching to the wall of your house, garage or garden, it will trap the warmth of the sun and heat from the house or brickwork itself to give your seedlings and less hardy plants the best possible protection.

The Europa lean-to allows the door to be fitted at either end.

Supreme Wall Garden

The Supreme Wall Garden features elegant curved lines and roof vent as standard, available in 26 size in either aluminium or green finish. It provides a surprising amount of space and a stylish look. The Supreme Wall Garden also has everything you require to get started including staging, shelving and seed trays. The curve is formed using acrylic panels.

Wall Garden 24

Even if space is limited or you simply want to supplement your greenhouse or require a protected growing area for a small number of seed boxes, pot plants, or vegetables – a Wall Garden is the answer. The Wall Garden comes with one roof vent as standard.

Wall Garden 26

The larger Wall Garden features a sliding door and a roof vent as standard, it provides plenty of space for starting your seedlings and protecting your valuable plants. The 26 Wall Garden is available in aluminium or green powder-coated finish.
